EDUCATION

Indian Institute of Information Technology, Nagpur

Nov 2022 – May 2026

B.Tech - Electronics and Communication | **GPA: 8.16**

Nagpur, India

Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, OOP

Father Agnel School, Delhi

Apr 2021 – Mar 2022

Senior Secondary Certificate (Class-12) - **94.75%**

Delhi, India

EXPERIENCE

HaBuild

Jun 2025 – Present

SDE-1 Bengaluru, India

- Architected the **Home Screen Configuration** platform end-to-end (rule engine + admin UI, **100K+** DAU) targeting cards and cohort banners by attendance, subscription, and challenge state, letting product/ops ship in **minutes** what once needed a **mobile app release**.
- Shipped **UX-Service** (community stories, feed, push) from empty repo to production in **~1 week**, using a materialized visibility window for fast feed reads; it now hosts the home-screen config engine.
- Engineered **multi-channel OTP delivery** (SMS/WhatsApp/email) with automatic cross-channel fallback in the auth service, cutting failed deliveries by **~60%** (96% → 98.4%) while lowering per-message cost.
- Closed **IDOR** vulnerabilities by adding ownership validation across all endpoints of **5 core services** (incl. payment, subscription), and hardened the shared auth SDK's JWT payload across **6+** services.
- Routed **98%+** of reads to **PostgreSQL replicas** + dual-Redis caching, halving read latency (**200** → **100 ms**); migrated messaging to **Confluent Kafka** across payment, notification, and chat services.
- Merged **450+** PRs across **23** repos and reviewed **40+** (incl. security/payment-critical); designed QR-code login (Redis session lifecycle + rate-limited polling) end-to-end.

TECHNICAL SKILLS

Languages: C++ (STL, Memory Management), TypeScript, JavaScript (ES6+), Python, Java, SQL

Backend & Frameworks: Node.js, NestJS, Express.js, REST APIs, WebSocket, WebRTC, Multithreading

Data & Messaging: PostgreSQL, MongoDB, Redis, Apache Kafka (Confluent), AWS SQS, MySQL

DevOps & Tools: Docker, GitHub Actions (CI/CD), Git, Linux (Bash), Postman

Concepts: Distributed Systems, Microservices, Event-Driven Architecture, Caching & Read Replicas, Auth & Security (JWT, OTP), Low-Latency Design

PROJECTS

Social Media App [Code](#) [Live](#) | *MERN, Chakra UI, WebSocket*

Jul 2024 – Aug 2024

- Orchestrated RESTful APIs for user feed aggregation with paginated, aggregated queries over MongoDB.
- Integrated full-duplex communication using WebSockets (Socket.io) for real-time instant messaging.
- Crafted a responsive user interface with Chakra UI, implementing optimistic updates for a low-latency experience.

Video Watch Party App [Code](#) [Live](#) | *Next.js, WebRTC*

Dec 2024 – Mar 2025

- Built a real-time synchronized watch-party platform supporting **10+** active peers with shared playback state.
- Implemented P2P media transmission via WebRTC, offloading media relay from the server to direct peer connections.
- Constructed an interactive dashboard using shadcn/ui components to manage concurrent video streams and chat.

ACHIEVEMENTS

Codeforces: Expert (Max Rating: 1676) | Top 2000 in India.

CodeChef: 4 Star (Div 2) | Ranked Top 500 in contests | Top 3K India.

LeetCode: Top 4% globally (Rating: 1900+) | 800+ problems solved.
